TN SENTINEL X PRO

Tamil Nadu Crime Intelligence & Decision Support System

Version: 1.0

Developed By: Rahan S

1. Introduction

TN SENTINEL X PRO is an interactive Microsoft Excel-based Business Intelligence and Decision Support System developed to analyse Tamil Nadu crime statistics. The project transforms raw crime data into actionable insights using data cleaning, analytical modeling, dashboards, and automation.

The workbook enables users to explore statewide crime trends, investigate district-level intelligence, and review executive insights through an intuitive interface.

2. Workbook Structure

The workbook contains the following worksheets:

- *HOME – Project landing page and navigation.*
 - *RAW DATA – Original crime dataset.*
 - *CLEANED DATA – Data transformed using Power Query.*
 - *DATA MODEL – Calculated metrics and analytical model.*
 - *PIVOT ANALYSIS – Pivot tables supporting the dashboards.*
 - *CHART LIBRARY – Collection of analytical charts.*
 - *EXECUTIVE DASHBOARD – Statewide crime overview.*
 - *DISTRICT INTELLIGENCE – Interactive district-level analysis.*
 - *EXECUTIVE INSIGHTS REPORT – Summary of findings and recommendations.*
-

3. How to Use

1. *Open the workbook and enable macros.*
2. *Navigate using the Home page buttons.*
3. *Use slicers and dropdowns to filter information.*

4. *Open the Executive Dashboard for statewide analysis.*
 5. *Open District Intelligence to investigate individual districts.*
 6. *Review the Executive Insights Report for management-level conclusions.*
-

4. Interactive Features

- *Dynamic dashboards*
 - *District selector*
 - *KPI cards*
 - *Pivot slicers*
 - *Dynamic charts*
 - *VBA navigation buttons*
 - *Dynamic KPI color updates*
-

5. System Requirements

Microsoft Excel 365 (Recommended)

Macros Enabled (.xlsm)

Screen Resolution: 1920 × 1080 or higher

6. Notes

This project is intended for educational and portfolio purposes to demonstrate Business Intelligence, Data Analytics, and Excel automation skills.
